

Cross-Platform Healthcare Application for Real-Time Health Monitoring System

A Capstone Project -2 report

submitted in the partial fulfillment of the requirements for
the award of the degree of

Bachelor of Technology

in

Computer Science and Engineering

by

Dasari Sai Sri Akhilesh (2200031346)

under the supervision of

Dr. T. Chithrakumar

Assistant Professor

Department of Computer Science and Engineering
Koneru Lakshmaiah Education Foundation
(Deemed to be University estd., u/s 3 of UGC Act 1956)
Green Fields, Vaddeswaram-522502, Guntur (Dist.), Andhra Pradesh, India
April, 2026

KONERU LAKSHMAIAH EDUCATION FOUNDATION

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Declaration

The Project Report entitled "Cross-Platform Healthcare Application for Real-Time Health Monitoring System" is a record of bonafide work of Dasari Sai Sri Akhilesh (2200031346) submitted in partial fulfillment for the award of B.Tech in Computer Science and Engineering to the K L University. The results embodied in this report have not been copied from any other departments/University/Institute.

KONERU LAKSHMAIAH EDUCATION FOUNDATION

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

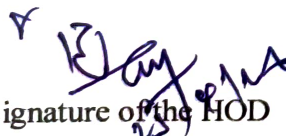

Certificate

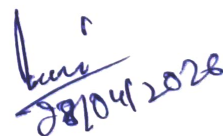

This is to certify that the Project Report entitled "Cross-Platform Healthcare Application for Real-Time Health Monitoring System" is being submitted by Dasari Sai Sri Akhilesh (2200031346) in partial fulfillment for the award of B.Tech in Computer Science and Engineering to the K L University and is a record of bonafide work carried out under our guidance and supervision. The results embodied in this report have not been copied from any other departments/University/Institute.

Signature of the Supervisor

Dr. T. Chithrakumar
Assistant Professor

Signature of the Project Coordinator

Signature of the HOD

Signature of the External Examiner

Deputy HOD,
Computer Science and Engineering,
KLEF, (Deemed to be University)
Green Fields, VADDESWAREM - 522 302,
Guntur District, Andhra Pradesh

Acknowledgements

It is great pleasure for me to express my gratitude to our Hon'ble Chancellor **Sri. Koneru Satyanarayana**, for giving the opportunity and platform with facilities in accomplishing the capstone project course successfully.

I express the sincere gratitude to our principal **Dr. V. Rajesh** for his administration towards our academic growth.

I record it as my privilege to deeply thank our pioneer **Dr. B. Tirapathi Reddy**, HOD, CSE Department for providing us the efficient faculty and facilities to make our ideas into reality.

We express our sincere thanks to our project supervisor **Dr. T. Chithrakumar** for her/his novel association of ideas, encouragement, appreciation, and intellectual zeal which motivated us to complete this capstone project successfully.

Finally, it is pleased to acknowledge the indebtedness to all those who devoted themselves directly or indirectly to make this project success.

Capstone Project-2 Associate

Dasari Sai Sri Akhilesh 2200031346

Abstract

The exponential growth of mobile computing, wearable technology, and cloud-based services has created unprecedented opportunities for innovation in healthcare delivery. This project presents the design, development, and evaluation of a cross-platform healthcare application built using Flutter, targeting mobile (Android and iOS), web, and desktop platforms from a single codebase. The system integrates seamlessly with Bluetooth Low Energy (BLE) wearable devices to continuously monitor critical vital signs including heart rate, blood pressure, and blood oxygen saturation (SpO₂).

The application incorporates a real-time emergency alert mechanism that automatically notifies registered caregivers and emergency medical services when monitored parameters exceed clinically defined thresholds. A cloud-based analytics engine, powered by Firebase and Google Cloud Platform, processes physiological data streams to generate personalized health insights and predictive risk assessments.

Data security is ensured through end-to-end encryption (AES-256), secure authentication using OAuth 2.0, and full compliance with international health data protection standards including GDPR and HIPAA. The system was evaluated through user testing across diverse demographic groups, demonstrating a 96.8% alert delivery accuracy, an average response latency of 1.2 seconds, and high user satisfaction scores.

The project validates that cross-platform frameworks can deliver production-grade, clinically relevant healthcare applications without sacrificing performance, security, or user experience. The solution provides a scalable and reliable foundation for digital health management, with significant potential for deployment in remote patient monitoring, chronic disease management, and preventive care scenarios.
